“Secrets and Practical Clinical Solutions of Successful Soft Tissue Management”

A Hands-On Program

November 5-6, 2010 (Friday-Saturday)

New York University College of Dentistry

Linhart Continuing Dental Education Program

With the growing reliability of dental implants, solutions for a variety of cases from single tooth restorations to full mouth rehabilitation have evolved. In addition, research and advances in implant design and augmentation techniques are making osseointegration and primary stability more predictable, enabling clinicians to focus more on achieving optimal aesthetics.

In many anterior aesthetic cases, optimal soft tissue development can determine the presence of papillae resulting in better aesthetics. However, alveolar ridge defects, tooth extractions and previous restorations may compromise this outcome. Preliminary treatment planning revolving around soft tissue management and the ability to choose the correct surgical soft tissue procedure can help better manage the foundation for optimal prosthetic restorations without compromising the outcome.

This two-day multimedia presentation will provide you with:

- **A fundamental understanding of soft tissue biology**
- **Selection criteria for your patients**
- **A better understanding of defect management**
- **A variation of surgical soft tissue procedures**

This course will demonstrate the following surgical procedures:

- **When to use flapless implant placement**
- **How to maintain and optimize keratinized gingiva around implants and teeth**
- **How to achieve soft tissue coverage after tooth extraction or immediate implant placement**
- **How to secure primary closure of extended ridge augmentation procedures with soft tissue by split-thickness flap designs**
- **How to plan and treat extended soft and hard tissue augmentation procedures**

Day One	
9:00 – 10:30am	Introduction of Soft Tissue Management Comparison to Flapless Surgery
10:30 – 11:00am	Coffee Break
11:00 – 12:30pm	Biology of Hard and Soft Tissue Classification of Hard and Soft Tissue Loss
12:30 – 1:30pm	Lunch
1:30 – 3:00pm	Keratinized Gingiva; Surgical Methods to Regain It Introduction to Hands-on Materials
3:00 – 3:30pm	Coffee Break
3:30 – 5:00pm	Hands-on (Model Workshop): Free Gingival Graft and Apical Position Flap in the Anterior Region Pedicle Gingival Graft for Socket Preservation
Day Two	
9:00 – 10:30am	Stappert's "Belly Pants" Theory / How to Increase Volume Connective Tissue Graft
10:30 – 11:00am	Coffee Break
11:00 – 12:30pm	Hands-on (Model Workshop): Connective Tissue Graft Split Thickness Flap in the Aesthetic Zone
12:30 – 1:30pm	Lunch
1:30 – 3:00pm	Palatal Pedicle Connective Tissue Flaps Combined GBR and Soft Tissue Regeneration
3:00 – 3:30pm	Coffee Break
3:30 – 5:00pm	Hands-on (Model Workshop): Combined GBR and Soft Tissue Regeneration at an Anterior Bicuspid

**Don't Forget The ING New York City Marathon
On November 7, 2010**

Registration Form

“Secrets and Practical Clinical Solutions of Successful Soft Tissue Management”

November 5-6, 2010 (Friday-Saturday)
Program Hours: 9:00AM to 5:00PM

New York University College of Dentistry
345 East 24th Street • New York, NY 10010

Tuition \$1,875 - Earn 14 CDE's Upon Completion

The Linhart Continuing Dental Education Program is open to all dentists throughout the world including dentists from the United States. All programs are in English. The registration fee is USD \$1,875 and is payable by U.S. cash, traveler checks or MasterCard/Visa charge cards. The meeting location is NYU College of Dentistry, 345 East 24th Street, New York, NY 10010.
